

# Atwood® CO Alarm

Featuring an easy-to-read digital display that clearly indicates CO levels.

The new Atwood® Battery Powered CO Alarm incorporates sophisticated electronic components to protect you and your family from the dangers of Carbon Monoxide (CO).

- Wall or ceiling mountable!

Non-Digital &

Digital Models

## Fuel Cell Technology

The electrochemical sensor contains a proton conducting membrane which generates a current in the presence of Carbon Monoxide (CO). This current is measured; information is processed and then displayed on the Alarm. The sensor is more accurate, uses less current and is less sensitive to humidity and other gases than competitive models. This technology was developed and patented by Atwood Mobile Products.

**Battery Operated**

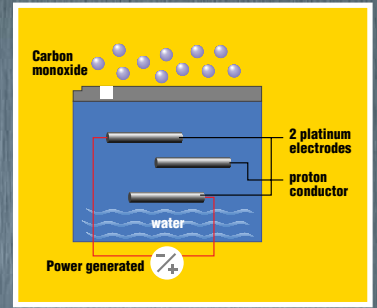

**Fuel Cell Sensor**

**Loud Alarm and Digital Display**

**Long Battery and Sensor Life**

**Wall or Ceiling Mountable**

**Picture Frame Leg**

### Digital Display

Updates CO level read-out every 15 seconds. Peak Level displays highest concentration detected.

### Multiple Location

A picture frame leg allows you to use the CO Alarm at multiple locations. Ideal for locating the CO source or for additional security when sleeping in another room.

### Battery Operated

The Atwood CO Alarm uses three AA batteries. The easy opening cover gives fast access to the batteries.

**NON-DIGITAL DISPLAY MODEL**

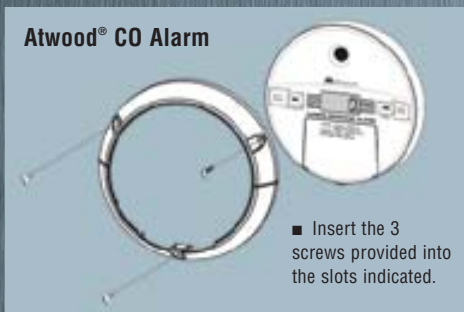

### Safety Feature

The Atwood CO Alarm cover is designed with a safety feature that makes it difficult to close the cover without batteries in the unit. This helps to prevent the alarm from being mounted without power.

## Carbon Monoxide Alarm Specifications

Model	Description	Dimensions			
		A		B	
		Surface Mount		Surface Mount
